

College Algebra
Summer Work Assignment
2009-2010

Welcome to College Algebra,

To ensure you are ready to step into this course, you are required to work the pre-requisite chapter in your book. Unfortunately, TJC has not determined what book and/or software you will need to purchase and will be using this semester. As soon as we know book that was selected we will inform you so you will be able to work on the pre-requisite. We will also include a detailed assignment that will include what and when the assignment will be due.

We look forward to working with you,

WHS Mathematics Department
