COMPREHENSIVE NEEDS ASSESSMENT

Students

Our students are the lifeblood of our school's success. It is the goal of Whitehouse High School to equip all students with the tools needed to not only succeed in our world, but to excel. Our site-based team has worked diligently to increase the course offerings and create rigorous selections that will prepare students for post-high school training.

Student Strengths:

Our students are typically supported at home and have been given the basic skills to succeed in school. Our academic performance reflects the student's abilities and cognitive achievement. The students are interested in taking a role in making the high school a better place.

Student Needs:

It is the goal of the school to have at least 90 percent of all students and all student groups passing the Texas Assessment of Academic Skill (TAKS) by the 2008 administration. We will be paying close attention to our subgroups that are not performing at an acceptable level. Although the rate of students passing all three tests is increasing, the rate is still considerably below the desired 90 percent. The school is addressing the needs of individual students by creating a personalized graduation plan for those students who are doing poorly in classes and on standardized testing. We are also providing a plan to meet the needs of students by creating TAKS remediation classes for students who will fail if intervention does not take place. The school will be working to provide for students needing remedial assistance through a dropout recovery program, home instruction, and after-school programs. Compensatory funds will be used to provide these services to the students identified as being at-risk according to the state's definition.

Staff

Having a staff of Highly Qualified teachers and staff is the goal of Whitehouse High School through established hiring practices. State law has long required teachers to be degreed and certified in the area(s) to which they are assigned. Federal law as promulgated in Public Law 107-110, No Child Left Behind Act of 2001, reemphasized this state requirement. According to the law, all teachers in states and /or school districts accepting Title I, Part A funds must be "highly qualified" to teach in the area(s) to which they are assigned by the end of school year 2005-07.

Staff Strengths:

Based on the most current data available, the teachers at the high school are highly experienced. The teaching staff is comprised of 57% females and 43% males. There is a good mix of new and experienced teachers, which allows for the proper transfer of knowledge within the profession. Well over half of our staff (60.7%) has 11 or more years of experience, which provides for an excellent foundation of mentor teachers for those new to the profession. The school is working hard to recruit quality minority teachers and teachers who are bilingual in order to meet the demands of our changing demographics.

Staff Needs:

A goal for the school is to address teacher in-service to provide appropriate training for teachers in their specific areas. In doing so, we can offer the courses that will best serve our students in preparation for the future.

Parent Involvement

The success of our school is significantly impacted by the participation of the parents and support groups. The Parent-Teacher-Student-Association (PTSA) is working diligently to help improve the communication skills of the school with the community through volunteer work to make a campus newsletter available to parents. There are many support groups available to parents to involve themselves in supporting the school.

Community Involvement:

The high school will continually look for new and innovative ways of including the community in the activities of the school. The community of Whitehouse is typically involved with the students and faculty of the high school through financial help and time commitment. The facility that we now have allows for increased participation of the community with the school.

Facilities:

The only thing that rivals the superior students at Whitehouse High School is the facility that is available to us. There are so many programs and activities that we can now promote as a result of the facility that directly impact the students of the high school. Our beautiful school is 260,000 sq. ft. and will hold 1600 students. The enrollment at this time is approximately 1279 students, which allows for several years of growth in the student population.
