HOLLOWAY SIXTH GRADE SCHOOL CAMPUS NEEDS ASSESSMENT

Goal I: All students will meet or exceed state and district educational standards.

Upon reviewing TAKS assessment data for the previous years, TAKS scores in both Reading and Math for 6th grade students have continued to remain fairly consistent. For 2007 – 2008, the sixth grade Math overall scores dropped 2% from 91% to 89%. All 6th grade math scores, with the exception of African American scores, dropped by a small percentage. African American scores did increase from 73 to 77%.

Sixth grade reading scores also dropped from 97% to 94% of the students mastering the TAKS. Every subgroup in the sixth grade except for Hispanic and At-Risk dropped. Hispanic scores remained the same while At-Risk scores increased from 92 to 98%. Overall, sixth grade scores remained consistently in the high range. The Holloway campus met AYP expectations with no negative indicators in any category.

African American, Hispanic, and Economic Disadvantaged subgroups continue to struggle with mastery of the information and instruction must be improved to meet this challenge. Therefore, each teacher will continue to disaggregate and analyze both TAKS and six weeks benchmark data on their students and will identify each student not meeting minimum expectations on the previous TAKS test. These students and teachers will conduct individual conferences addressing non-mastered reading, math and science objectives. Particular emphasis will again be placed on targeting the performance of the African-American, Hispanic and Economically Disadvantaged subgroups.

Even though there were not a sufficient number of students taking the TAKS test to affect Holloway's rating, the Special Education Score scores dropped dramatically. Since it was the first year for Special Education students to take TAKS A or TAKS M, there was a great deal of uncertainty on how they would perform.

Curriculum alignment in Language Arts will continue with emphasis on consistency in reading alignment and additional teacher training involving the Shurley Method. The Read 180 program will also be used to help improve the reading scores of the students who failed the 5th grade Reading TAKS test the first time. Math will continue its alignment both vertically and horizontally with emphasis on grades one through twelve. Instruction that develops higher order thinking skills will continue to provide students with strategies that will enable them to be more successful on the more difficult TAKS assessments. Teacher professional development will continue through campus and district in-service and through Region VII Educational Service Center and through content specific conferences and seminars. The campus-wide Title I teacher will continue to work with at-risk students on reading comprehension which will help them in both the areas of Reading and Math. Accelerated Reading and Math instruction proved to be very successful with all students and will again be implemented with 6th grade students to strengthen skills in both math and reading. Extended day tutorials will again be implemented two days a week and 6th grade in-school tutorials will begin the first week of school.

Goal II: Vertical and horizontal curriculum alignment will be emphasized to assure equitable student achievement for all students.

Based on the 2008 assessment data, and reviewing the 2005, 2006 and 2007 TAKS results, overall scores in Reading and Math continue to be in the upper 80's and lower 90's, but certain subgroups continue to struggle. As a result of the more challenging TAKS assessment, TEKS will again be aligned by six weeks during the 2008-2009 school year. Benchmark tests for each subject will be refined during the school year. Student fatigue continues to impact TAKS assessment results and consequently, Benchmark tests will include longer and more rigorous passages in order to build student stamina. Teachers will continue to receive additional training in Language Arts and Math strategies.

Goal III: Learners will have appropriate technological resources to support the district's educational performance goals.

The campus and district will continue to train staff in the use of district software applications and programs. The campus staff will continue to refine skills in the use of technology as an instructional tool in the classroom and will continue to implement the new benchmark assessment system. Students will be given additional technology instruction either in the campus computer lab or through individual classrooms. Classroom computers will start being either upgraded or replaced during the 2008-2009 school year to meet the increased demands of new district software and programs. A Read 180 lab will be created so that the Computer Lab can be used for classroom instruction. Nine computers will be purchased from ARI money to supplement the Read 180 lab.

Goal IV: Federal compliance standards will be met in order to increase student achievement.

TAKS results show that overall scores of all subgroups again continue to show a need for intervention. In effort to meet the needs of these subgroups the campus will continue to update manuals and provide staff and parents the latest information in regard to 504, ESL, Special Education, Gifted and Talented, At-Risk policies and procedures and the Student Success Initiative (SSI). A Read 180 Lab will be employed on the campus to provide intervention for at-risk students in reading. The campus will also utilize state and federal funds for Accelerated Reading and Math Instructional programs and staff. Extended day tutorials will again be implemented two days a week as 6th grade in-school tutorials for at-risk students. The campus will continue to provide English as a second language (ESL), Dyslexia, and Special Education instruction for qualifying students.

Goal V: State compliance standards will be met in order to increase student achievement.

Once again, results from TAKS data indicate that African-American, Hispanic and the Economic Disadvantaged subgroups continue to require additional instructional strategies. Therefore, the campus will continue to provide teachers and staff with opportunities for training with regard to identifying special population students, the process for the referral of these students, and information on identified population students and their modifications. Once identified, these students will be provided small group instruction, dyslexia training if appropriate, Read 180 reading training, classroom tutorials and extended day remediation for identified at-risk students. All students not meeting minimum standards on any portion of the 5th grade TAKS assessment (Reading and Math) will have an individual Accelerated Instruction Plan (AIP) developed for the 2008-2009 school year. Sixth grade teachers will increase the number of in school tutorial sessions from two to four thus allowing at-risk students more individualized instruction.

Goal VI: A safe drug-free and orderly learning environment will be provided for our students.

The Holloway campus will continue to provide a character education program for students. Students will be trained as peer mediators using the Region VII Educational Service Center model. After students are trained, peer mediation is available to all students on the campus as a positive means of conflict resolution. Other conflict resolution programs will also be offered by the Counselor. In compliance with state guidelines, a core team of teachers has been trained in Crisis Prevention Intervention and the Texas Behavior Support Initiative and in the fall will be trained in the methodology and implementation of strategies for the Student Intervention Review team. The campus and district, in association with Region VII Education Service Center, will continue to implement the Coordinated Health Program (CATCH) into the curriculum. The campus will also provide an intervention/counseling program to meet the new state law in regard to “Dating Violence” intervention.

Goal VII: The campus will work to attract and maintain the highest level of qualified personnel.

The site-based team is an integral part of the campus planning and operation. The site based interview team will continue to conduct interviews of candidates for campus instructional positions and make recommendations to the campus principal. The team and the principal strive to employ only highly qualified teachers for these positions. All employees are either required or encouraged to continue with professional development training. On the Holloway campus, ALL classroom teachers are required to obtain the 30-hour Gifted and Talented certification through the Region VII Education Service Center. In addition, all staff members are afforded opportunities to attend regional and state professional development offerings either through in-service, workshops, conferences or seminars.

A conscientious effort is made to ensure that all low-income students and minority students are afforded the same educational opportunities as every other student on the campus and that a “highly qualified” teacher instructs each student. All educational assistants providing direct services to students are “Highly Qualified”.

Goal VIII: Increase parent involvement on the campus.

At Holloway Sixth Grade School, parents are involved through a PTO and the Band Booster Club. The WJH/Holloway PTO will support both campuses allowing for continuity in 6th through 8th grades. A Mentor program will be initiated during the 2008-2009 school year in order to work one to one with at-risk and subgroup populations to improve reading skills.

Parent orientations will again be held at the beginning of the school year and parents are encouraged to meet their child’s teachers and discuss both classroom and campus policies and procedures. During the spring, orientations are held for 5th grade parents with regard to students transitioning to 6th grade, and for 6th grade parents as their children advance to the Junior High Campus. During spring orientations, departmentalization, class schedules, advance academic classes, and fine art electives for the next year are discussed. On the Holloway Campus, parents are viewed as a multi-faceted component of our education process.
